Dear colleague

We recently met with (.....)
who advises that they are not currently registered with a local GP.

This person lives in Sutton, however is currently homeless or does not have a permanent address.

Please would you support him/her to register with your practice. Please be aware that he/she may not be able to provide the usual forms of ID or proof of address, however this should not prevent GP registration.

The person may also need some additional support with undertaking the registration process, eg:

- Help with completing the paperwork
- Translation services

It may also be helpful for him/her to have an initial check up with a GP once they have registered.

Thank you for your support with helping with this registration.
